DMITRY DROBOV

MIDDLE QA ENGINEER

Middle QA Engineer with 4 years of experience.
Worked as the sole QA engineer across 20+ web and mobile products. Built and maintained 2,000+ test cases independently. Tested products in 10+ domains including AI/ML, Healthcare, Blockchain, EdTech, and E-commerce.

Strong background in API testing with Postman and Swagger, mobile traffic interception with Charles Proxy and HTTP Toolkit, and load testing with JMeter.

Experienced in testing chatbots and conversational AI products.

English B2+. Fully comfortable working in English-speaking teams.

SKILLS

Testing types:
Functional, Regression, Smoke, E2E, Exploratory, Ad Hoc, UI/UX, Cross-browser, Cross-platform, Load Testing, Security Testing (OWASP basics), API Testing, Chatbot and AI Product Testing.

Tools:
- API and Traffic: Postman, Swagger, Charles Proxy, Fiddler, HTTP Toolkit;
- Mobile: Android Studio, Xcode, BrowserStack;
- Performance: JMeter;
- Test Management: TestRail, Jira, Confluence, Trello;
- Databases: SQL, MySQL, PostgreSQL, MongoDB, DBeaver, pgAdmin;
- Dev: Chrome DevTools, Git, GitHub, Bash, Linux;
- Basics: HTML, CSS, JavaScript, Python.

Methodology: Agile, Scrum.

WORK EXPERIENCE

QA Engineer - SolveIt (Sept. 2024 - Apr. 2026),
QA Engineer - Interexy (Sept. 2022 - Jul. 2024)
As the sole QA engineer across 5+ simultaneous web and mobile products, I owned the full quality lifecycle independently — from requirements review to release sign-off (20+ total products).

Key contributions:
- Designed and maintained 2000+ test cases in TestRail with severity/priority classification;
- Tested chatbot and AI systems: NLP intent accuracy, fallback behavior, API integration validation, edge-case conversation flows;
- API testing via Swagger and Postman (collections with 100+ requests per project, covering auth, CRUD, error handling, edge cases);
- Comprehensive mobile testing: iOS (Xcode) + Android (Android Studio) + BrowserStack across 50+ device/OS/browser configurations;
- Mobile traffic interception with Charles Proxy & HTTP Toolkit: breakpoints, rewrite rules, map local/remote, throttling; deep-link testing, push notification delivery chains, token handling — identified mobile-specific production-critical defects;
- Cross-browser and cross-platform testing: identified 100+ UI/UX discrepancies across platforms;
- SQL data verification via DBeaver/pgAdmin (MySQL, PostgreSQL);
- JMeter load testing: validated system stability under simulated traffic before production releases;
- Security-focused testing: OWASP Top 10 basics — input validation, auth bypass, session management;
- Agile/Scrum: sprint planning, standups, retrospectives;
- Full defect lifecycle management in Jira/Confluence.

Domains: AI/ML (chatbots), Healthcare, Blockchain, Media & Entertainment, Travel & Logistics, E-commerce, EdTech, Game Dev, Social Networks.

QA Engineer (Internship) - Aviakassa.com (Jun. - Aug. 2022)
Internship testing web and Android mobile applications.
- Functional, smoke, regression, cross-browser testing, etc.;
- Test case writing and bug report filing;
- Figma layout comparison for pixel-perfect UI verification;
- Daily standups with development and QA team;
- Making suggestions for product improvement (application performance and user experience).

EDUCATION

Master Degree in Psychology (2007 - 2008), Bachelor Degree in Psychology and English (2002 - 2007) - Belarusian State Pedagogical University named after M. Tank.

Primary School and English Teacher - Minsk State Pedagogical College #1 (1998-2002).

COURSES

Course - **"Software Testing"** - Stormnet Technologies (2022).
Author's Course by Vadim Ksendzov "Software Testing" (2022).
YouTube Course - "Tester From Scratch" by Artsiom Rusau (2022).

CERTIFICATES

Software Testing Course (Stormnet Technologies) (link).
HTML, CSS, SQL, JavaScript and others (Sololearn and Stepik online courses) (link).
